Analytics Vidhya	Data Analyst, Content/Data roles, BI-style roles, ML Engineer	₹8–12 LPA+	1. Screening 2. Aptitude or logic round 3. Data/SQL or analytics round 4. Hiring Manager Round	1. End-to-end data analysis project with cleaned data, insights, and recommendations 2. Machine learning classification project such as churn prediction or loan default prediction 3. NLP project like sentiment analysis or resume/job matching

How to Use This Guide

Pick Your Target Companies

Filter by role type, package range, and industry. Prioritize 5–8 companies that match your skills and interests.

Build the Right Projects

Each company lists 2–3 recommended projects. Replicate at least one per target company to show domain readiness.

Prep the Interview Rounds

Study the round breakdowns carefully. Most companies follow: Aptitude → SQL/Coding → Analytics → Manager → HR. Practice accordingly.

Tailor Your Resume

Use the exact role titles and keywords from each company's listing. Align your project descriptions with their recommended topics.
